EDUCATION

Columbia University in the City of New York

Bachelor of Arts in Computer Science – Minor in Education Studies • US, New York • 2023

The Paris Institute of Political Studies (Sciences Po)

Bachelor of Arts in Economics – Minor in International Finance • Paris, France • 2023

SKILLS

Languages & Scripting: Python, Java, JavaScript, C, SQL, TypeScript, **Web & Front-End:** React, HTML, CSS, Node.js, Flask, **Cloud & DevOps:** AWS, Azure, Oracle Cloud Infrastructure (OCI), REST APIs, Git, Docker (basic), **Databases & Data Management:** PostgreSQL, MongoDB, relational database design, data cleaning & ETL workflows, **Tools & Prototyping:** Figma, Xcode, Swift, WatchOS SDK, Flask for front-end prototypes

EXPERIENCE

Technical Program Manager

Linkit!

March 2025 , New York, NY

- Led cross-functional feature delivery end-to-end, translating stakeholder needs into clear technical requirements and coordinating design/engineering through testing and release.
- Owned sprint planning, timelines, QA cycles, and production launches to ship accurately and on schedule.
- Partnered with Product and Customer Success to measure adoption, analyze usage patterns, and prioritize iterations based on insights.

Data Analyst

Linkit!

July 2024 – March 2025, New York, NY

- Analyzed and modeled K–12 student performance data using Python/SQL/Excel to surface actionable trends that informed product and instructional decisions.
- Built interactive Tableau and Excel dashboards for achievement/growth metrics, enabling data-driven decisions for district stakeholders and supporting product prioritization.
- Worked with product/engineering to translate insights from evaluations and multi-district datasets into improved analytics tools and workflows.

Information Technology Associate — Technical Support & Systems

Columbia University

August 2021 – January 2023, New York, NY

- Provided technical support across devices/systems; diagnosed issues, resolved tickets, and documented fixes to reduce repeat incidents.
- Partnered with stakeholders to triage requests, manage access/setup, and improve reliability of day-to-day tools and workflows.
- Led basic trainings and 1:1 support for staff during rollouts/updates, ensuring smooth adoption of new systems and minimizing disruption.

User Researcher/ Analyst

Columbia University (Counseling & Psychological Services (CPS))

September 2022 – December 2022, New York, NY

- Conducted mixed-method research (interviews, analysis, usability testing) to identify barriers in an existing mental health support workflow.
- Synthesized insights into actionable recommendations that influenced design direction and workflow changes.
- Built and tested UI prototypes to validate hypotheses; iterated based on feedback and increased user satisfaction by 20%+.

Technical Program Instructor

Amazon & ID Tech Camps

July 2021 – March 2025, SF, LA, DC & Remote

- Delivered 600+ STEM lessons, communicating technical concepts clearly and ensuring high comprehension across mixed experience groups.
- Built AI-driven tools to personalize curriculum experiences, applying hands-on problem-solving to improve engagement impact.
- Partnered with curriculum and product to test new features, validate end-to-end workflows, and drive iterations from feedback and QA findings.

Technical Program Manager (STEM Outreach Program)

Oracle

March 2019 – December 2022, San Francisco, CA

- Managed program execution across engineering, education partners, and external stakeholders to ensure timely delivery, demonstrating strong cross-functional alignment.
- Applied user research insights to improve workshop design, boosting adoption and increasing participant success outcomes.
- Coordinated logistics, resources, and timelines end-to-end with rigorous detail-oriented planning.

PROJECT

Aliotos – Communication App [Swift, WatchOS SDK, CloudKit, Xcode]

- Engineered a full-stack Apple Watch + iOS companion app as an AAC solution, enabling nonverbal children to communicate through customizable symbols, text, and speech, and interact with caregivers via real-time messaging and location tracking.
- Designed and tested accessible UI/UX with a speech therapist, ensuring usability across varied motor skills and supporting daily routines.
- Used daily for requesting needs, responding to prompts, and participating in everyday activities, improving independence and easing caregiver support.

OCI Automation Tool [Python (Flask), JavaScript, HTML, Oracle Cloud Infrastructure (Functions, Object Storage), REST API]

- Built a secure, scalable platform on OCI to streamline file uploads, generate pre-authenticated links, and deliver them via Slack, email, and text.
- Integrated RESTful APIs with Object Storage and Functions, reducing workflow complexity and increasing system reliability.
- Developed a front-end prototype using Flask, JavaScript, and HTML to demonstrate file-sharing workflows and functionality.
